Farmville, Va., April 21st, 1899.  
To my friends who are farmers in Prince Edward and adjoining counties, and others who may be interested:

Having been a tobacco buyer on the Farmville market for a number of years, and my own interest compels me to notice carefully and critically the Leaf Tobacco offered on our market for sale, as to its quality, color and texture particularly during the present season, as there has been a large proportion of dingy colored, coarse, bony tobacco offered, and I think I can cordially say, after a close observation that the tobacco offered on our market said to be made by the Fertilizer known as "Dunnington's Special," has shown more fat, finer texture, better quality, and color, as a general thing than other tobaccos sold on our market. And as far as my observation goes, makes a much better and more suitable tobacco for general purposes than tobaccos heretofore sold on our market.

The above statement is written without being solicited, and is given as my own opinion, and I hope may prove to the best interest of my friends who are farmers in this and other counties as well as to the tobacco trade generally.

Yours truly,  
A. W. DRUMELLER.

Farmville, Va., April 22, 1899.  
Messrs. Virginia State Fertilizer Co.,  
Farmville, Va.

Gentlemen:—It has been very noticeable to me as a tobacco buyer on the Farmville market that the tobaccos offered for sale on the warehouse floors the past season which were produced by the use of the brand of guano known as "Dunnington's Special Formula for tobacco" were of finer texture, better weight and quality, and more uniform in color than those raised by the use of other guanos.

Yours very truly,  
DUNLOP & STOKES.

Lynchburg, Va., December, 28, 1898.  
Virginia State Fertilizer Co.,

Dear Sirs:—It becomes our duty as well as our pleasure to assure you of the efficiency and reliability of the various grades of fertilizers you manufacture. That your goods are held in high esteem by prominent and fair producers of tobacco, is a fact beyond contradiction. We have, the past season, sold 500 tons, and have yet to hear the first complaint that the goods did not act as they were represented. Our patrons express much satisfaction at the results and superiority by field test over other guanos representing same analysis. We have every right to assure you that your trade in this locality and surrounding counties will more than
